Good to know Paul. We got the info from the FAA rep at the FEMA RRCC. Maybe your pilots can confirm? Possibly have something ready to pull the trigger by morning

Also,
Our pilots have been in contact with FAA (in preparations for future missions in the area). We can get into the area if needed. They are familiar with our aircraft and crew.

I don't believe ASPECT can provide any meaningful info at this point since it appears there's no release yet. It is the threat of explosion or fire, then there'll be something to monitor for.

I believe FAA issued a no fly order over the facility until we get better situational info. Info came from Steve at RRCC. Steve??
